

# The impact of live, synchronous instruction is constrained by class size

In order to benefit from the interactivity of live-streaming, class size in the K-8 setting needs to remain small or it becomes unmanageable.

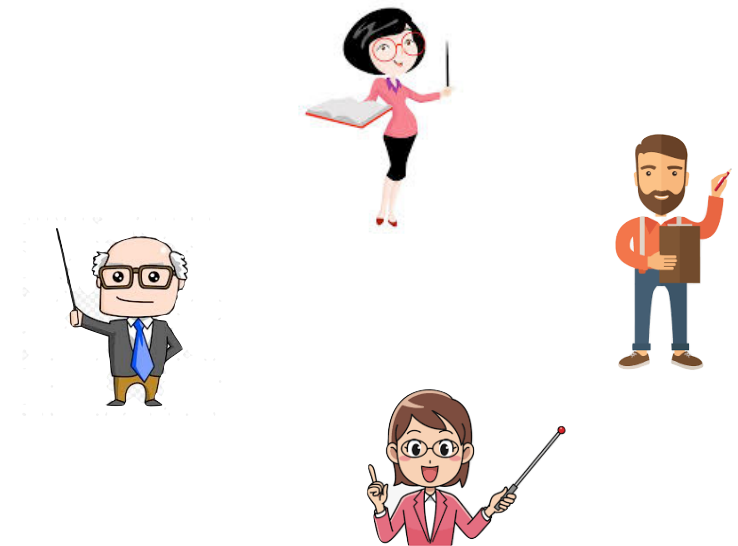

# Pre-recorded videos and curated online content leverage schools most valuable resource: teachers!

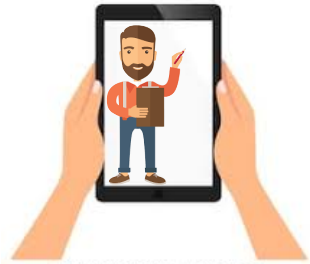

Recorded videos can be watched by multiple classrooms, allowing other grade-level teachers to:

- Record additional high-quality video lessons
- Curate high-quality videos from reputable education sources
- Create daily lesson plans
- Participate in professional development
- Create and review assessments
- Provide feedback on assignments
- Scope and collaborate on future curriculum and instruction
- Conduct one-on-one student conferences
- Conduct smaller group meetings to discuss or review content
- Hold virtual “office hours”
- Communicate with parents and students - answer questions and communicate progress & concerns

# A tailored combination of school-created videos, curated videos, & adaptative software meet the varied needs of students

## Advantages of school-created videos:

- Students learn from teachers they know and love, which contributes to student engagement
- Curriculum tailored exactly to the needs of teachers and students

## Advantages of curated videos:

- Advanced production tools, resources, and expertise (such as animation) allow for engaging, “entertainment-like” content
- Frees up teacher time to work on other vital teacher functions

## Advantages of adaptive software:

- Software adapts to the specific level of the student, giving more practice in areas needing development and advancing content when skills have been mastered
- Software assesses and summarizes individual student learning, allowing teachers to target future instruction on individual student needs
- Advanced production tools, resources, and expertise (such as animation) allow for engaging, “entertainment-like” content
- Frees up teacher time to work on other vital teacher functions
