Create, Challenge, Collaborate

Seventh Grade Takes Action

Over the course of Trimester 2, seventh grades students are immersed in numerous academic projects that focus on the power of taking action for a cause. From addressing how to implement social change within a fictional school setting, to the Take Action Project in Science, to the Humanities Social Justice Project and Right Action Presentation, seventh graders examine how taking action can make a positive impact on their community and the world.

1

TAKE ACTION PROJECT

Science students dive deep in their research and examination of topics ranging from infectious diseases to ocean pollution.

2

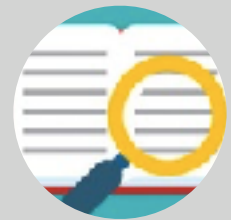

SOCIAL JUSTICE

English students research individuals and organizations whose actions make a difference in addressing multiple social justice issues.

3

RIGHT ACTION

Students design presentations that explore the importance of demonstrating right action in literature and the real world.

Informed

T2 focuses on informational writing, research, and presentation aspects across disciplines.

Engaged

Students learn the power of being an engaged individual whose actions can enact positive change.

Prepared

Students develop their ability to present facts and evidence in order to engage and inform an audience.
